

Medical Equipment Access

Medical Equipment Access

- ◆ NIHB provides coverage to registered First Nations a specific range of medically necessary items that are not covered by other plans and program. Clients will need to get a Rx from their family doctors for the medical equipment they require and bring it in to the Home & Community Care Department. We will then send it to one of the medial supply outlets who will get it approved through NIHB and deliver and install the equipment to their home.
- ◆ The Red Cross Loans Cupboard @ NVHC provides some medical equipment for people to borrow until they either no longer require it or have obtained their own through NIHB.
- ◆ Schss Home & Community Care Department also has a small loans cupboard where medical supplies can be signed out for short term use on a temporary basis.
