

## **INFLUENZA CLINICS**

*Flu clinics are put on annually as part of the immunization program. Flu Vaccines are safe and help prevent the influenza virus, which is responsible for thousands of deaths in Canada each year. Elders and children are especially at risk for getting complications with the flu. There is one clinic day in Coldwater, Nooaitch, and Shackan communities, or individuals can make office appointments any time during the flu season (November-March) for their vaccines. Please see the monthly calendars for the flu clinic dates.*
