

MAMMOGRAM CLINICS

The Canadian Cancer Society (CCS) recommends women ages 50 to 69 have a mammogram every 2 years. Women ages 40 to 49 and over age 70 should talk to their doctors about whether they should have regular mammograms. SCHSS hosts mammogram clinics in coordination with the LNIB Health Centre. Call SCHSS for the mobile mammogram clinic at 1-800-663-9203.
